

Program:

```
program ::= "form" name "{" form_body "}"  
        | metadata section_list validation_block
```

Form Body:

```
form_body ::= metadata section_list validation_block
```

Metadata:

```
metadata ::= "meta" name "=" string ","
```

Section List:

```
section_list ::= section+
```

Section:

```
section ::= "section" name "{" field_list "}"
```

Field List:

```
field_list ::= field+
```

Field:

```
field ::= "field" name ":" name (string_array)? attribute_block ";"
```

Validation Block:

```
validation_block ::= "validate" "{" validations "}"
```

Validations:

```
validations ::= ("if" condition "{" "error" string ";" "}")+
```

Condition:

```
condition ::= name ("<" | ">" | "==") number
```

Attribute Block:

```
attribute_block ::= attribute*
```

Attribute:

```
attribute ::= "required"  
            | ("min" | "max") "=" number  
            | "default" "=" string  
            | name "=" (number | string | "true" | "false")
```

String Array:

```
string_array ::= "[" string ("," string)* "]"
```

Name:

```
name ::= letter (letter | digit)*
```

String:

string ::= "\"" character\* "\""

Letter:

letter ::= [a-zA-Z\_]

Digit:

digit ::= [0-9]

Character:

character ::= [\x20-\x7E] (\* Any printable ASCII character except " \*)
